Implementation & Professional Services SaaS Specialist

Implementation and Professional Services specialist with ~15 years of experience delivering SaaS solutions, including onboarding, configuration, integrations, analytics, and customer enablement. Background spans implementation, data analysis, and technical documentation, with growing expertise in AI-augmented workflows — from RAG architecture and semantic search pipelines to LLM-optimized documentation systems. Strong client-facing communicator who translates technical requirements into reliable, maintainable solutions. Fluent in Spanish.

Experience

Technical Writer • TrueContext • 06/2025 – Present

- Built a Python pipeline using Claude Code that converts MadCap Flare topics to AI-optimized Markdown, integrates per-topic download links into the live docs at build time, and publishes a full Markdown documentation set to Bitbucket for LLM ingestion.
- Defined a 10-rule AI-readiness standard for the Flare knowledge base, covering structure, style, and topic templates to ensure reliable citation by AI tools.
- Designed and implemented an AI-powered local semantic search solution in n8n: ingested Flare docs into Postgres, generated OpenAI embeddings, indexed in Qdrant, and applied a JavaScript re-ranker with multi-signal scoring to reorder results for higher relevance.
- Manage the customer documentation portal by maintaining reusable, structured content in MadCap Flare (https://docs.truecontext.com/).
- Partner with Product and Engineering to prioritize documentation topics, collaborating via Jira/Confluence and SME reviews.

Implementation Specialist • TrueContext • 04/2024 – 06/2025

- Engineered an internal Chrome extension using Claude Code, that bundled four internal productivity tools: an AI-powered API error surfacer, a conditional logic analyzer, an audit report dashboard, and a BI dashboard.
- Managed and implemented customer projects from start to finish by developing mobile forms, workflows, and custom integrations using scripting and app-to-app communication.
- Delivered LLM-assisted implementations through JSON form editing and FreeMarker/Handlebars templating.
- Built data models, ETL scripts (BQL), dashboards, and advanced reports in Birst to meet client reporting requirements.
- Created Python automation for large-dataset cleanup and SharePoint field mapping from LLM-generated HTML tables; replaced BI export limits with partitioned API exports and scheduled delivery.

Analytics Implementation Specialist • TrueContext • 10/2018 – 06/2021

- Built data models, ETL scripts (BQL), dashboards, and advanced reports (including bursting).
- Delivered on-site analytics training.

Technical Support Analyst • TrueContext • 02/2018 – 09/2018

- Provided multi-channel customer support using Zendesk.

Service Analyst • Noibu • 03/2023 – 04/2024

- Supported Customer Success Managers by prioritizing visual errors, building reports (Metabase, Tableau), configuring checkout flows, contributing to QA efforts, and providing DevOps support.

Technical Writer • Machine Learning • Monsters Aliens Robots Zombies • 11/2021 – 03/2023

- Authored technical documentation on machine learning workflows to onboard new developers.
- Supported product enablement through research, testing, and internal training.

IT Manager & Reporting Specialist • Tartan Homes • 08/2012 – 02/2018

- Managed data flow across ERP and CRM systems.
- Automated reporting using Crystal Reports, SQL, and VBA; built custom workflows and scripts.

Database Consultant • United Nations Environment Programme (Mexico) • 09/2003 – 03/2004

- Led interactive projects using PHP and MySQL to support UNEP campaigns.

Skills

Implementation & Professional Services • Onboarding • Discovery • Scoping • Configuration • UAT • Customer Enablement

Integrations • REST APIs • Webhooks • OAuth 2.0 • JSON • Scripting • Python

AI & Automation • Agents • Prompt Engineering • RAG • Embeddings • Vector Indexing • LLM-Assisted Automation • Claude Code • n8n • Power Automate • Zapier

Data & Analytics • SQL • ETL • Data Modeling • BQL • Dashboards • KPIs • Reporting

Other • Spanish (Fluent) • MadCap Flare • GitHub • Jira • Confluence • Open API

Education

Data Analyst Nanodegree in Data Analysis • Udacity • 2017 –2018

Certificate in Geographic Information Systems • St. Lawrence College • 2010 –2011

Bachelor of Science (B.Sc.) in Computer Science • University of Ottawa • 1998 –2003

Volunteer Activities

Team Leader • Eyecare Clinic (Hungry for Life) • Kenya • 2017

- Organized and led a two-week eye-care clinic in the Siaya District, Kenya (540 patients).

Humanitarian Volunteer • Action International Ministries • Mexico City, Mexico • 2007-2011

- Taught English, computer skills, and pioneered a youth road hockey program.
- Provided Spanish-English translation support for UNDP and UPA! Cure Duchenne Mexico.

Personal Projects

Uncommon Rhymes (in development) • Python web app that scores rhyme rarity and explains choices; Datamuse API + LLM for suggestions/explanations.

LiLo – Live Local Experience App (in development) • Mobile app with social auth, bookings/approvals, messaging, and photo uploads.

PickleBot • Backend bot for slot capture with email-code handling and scheduling, built by reverse-engineering network booking flows.
